

# Bolden 200 Global

## **bolden 2007**

we have used this technique of hybridization subtraction chromatography to select a mrna population enriched for the mrnas inducible by ecdysterone in schneider's line 2 drosophila cells

## **bolden 2004**

if dissolved in a drink, rohypnol is odourless and tasteless but can colour blue or raise a blackish tint to any drink because of a new dye
